

Excel to the Max

Flt Sgt Antoni Outulakowski from 134 (Bedford) squadron Air Cadets has just returned from interviewing a brand new aerobatic display team on behalf of the Air Cadet Magazine

Found in the small village of Sywell, Northamptonshire. 2Excel Aviation opened their spotlessly clean hanger to show Antoni, their four pristine new Extra 300 LP aircraft which were built especially for the team - the blades.

The blades boast that they are the countries first full time civilian aerobatic display team. They may have only performed their first public display less than a month ago but when you consider that one of those displays was to a mass of celebrities at David and Victoria Beckham's pre-world cup party in Hertfordshire you can appreciate where this team is going.

The pilots also have the know how. three of them are former Red Arrows Pilots, including the team leader who also led the Red Arrows for 2 years.

We don't want to reveal too much about the interview, so look out for the full article, which should go to print in the July/August edition of the national Air Cadet magazine.
